

SIGNATURE 12

Highend turntable

MSRP 9500 € (incl. VAT)

- Mass-loaded subchassis design
- Magnetically decoupled main platter
- Resonance-optimised alloy
- Inverted main bearing with ceramic ball
- Flywheel belt drive
- Motor control system with LCD display
- Single-pivot tonearm
- High gloss metal surface
- Piano-lacquer chassis with magnetic decoupling

colour options: 

Speed: 33, 45 electronic speed change
Actuation principle: Flywheel belt drive
Motor control system: Precision generator with LCD display
Platter: 10,55 kg magnetically decoupled
Main bearing: ceramic (ball/plate)
Tonearm: 12"; single-pivot, aluminium
Effective arm length: 304,8 mm
Effective arm mass: 19,5 g
Cartridge mass: 4 - 10g, several counterweights included
RCA connectors: gold plated
Power supply: 16Volt/xxx mA included
Dimensions: 570x 440 x 234mm (WxHxD)
Weight: 34,3 kg

Signature is a non-compromise highend turntable. A highly sophisticated concept combines the mass-loaded principle with subchassis. Magnetic feet decouple the chassis from surface, "Sorbothanepillows" and a magnetic-floating platter guarantees an absolute quiet running turntable. A "flywheel" belt drive system ensures vibration-free running. The new single-pivot

tonearm is a genuine Pro-Ject design. With its wide range of adjustment possibilities and the choice of adequate counterweights, nearly all cartridges can be mounted. Signature is an audiophile marvel, that represents our championship in precision engineering and our deep love for music!
